

In the Claims:

Please cancel claims 6-27, without prejudice.

1. (Original) A reflection-type liquid crystal display device comprising:  
a light guide plate having a polarizing element stuck or adhered thereto  
on the side facing a reflection-type liquid crystal display panel and arranged maintaining a  
predetermined gap relative to the reflection-type liquid crystal display panel;

a source of light arranged on an end surface side of the light guide plate;  
a light-diffusing function imparted to the surface of the reflection-type  
liquid crystal display panel on the side facing the light guide plate.

2. (Original) A reflection-type liquid crystal display device  
according to claim 1, wherein the reflection-type liquid crystal display panel has a rough  
surface on the side facing the light guide plate.

3. (Original) A reflection-type liquid crystal display device  
according to claim 1, wherein a film having a light-diffusing function is stuck to the surface  
of the reflection-type liquid crystal display panel on the side facing the light guide plate.

4. (Original) A reflection-type liquid crystal display device  
according to claim 3, wherein the film having the light-diffusing function comprises a

sticking layer containing a light-diffusing material and a triacetyl cellulose film.

5. (Original) A reflection-type liquid crystal display device according to claim 3, wherein the film having the light-diffusing function is subjected to the reflection-preventing treatment on the side of the interface to the air layer.

6-27. (Cancelled)
